## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 17-20, 25, 26, 34, 35, and 37-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Hasegawa et al #4,813,812. Hasegawa et al discloses a revetment block comprising: a substantially rectangular block having a top and bottom surface; first and second end walls; first and second sidewalls (generally about 16 and 20) having at least one vertical surface and inwardly and outwardly extending transition surfaces defining an interlock; the endwalls being substantially parallel and the sidewalls being substantially parallel; and first and second corner spaces defining interlocks (see figure 11 which shows interlocking at corner spaces). Hasegawa et al discloses the plurality of blocks forming a mattress including half sized blocks 38.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-16, 21-24, 27-33, and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hasegawa et al in view of Scales #4,465,398. Hasegawa et al

Art Unit: 3673

discloses the claimed invention except for the tapered apertures, the dome, and the ducts. Scales teaches that it is known to provide tapered apertures 10, a dome 24, and ducts 5 as set forth at column 4-5, lines 23-20. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide tapered apertures, a dome, and ducts, as taught by Scales in order to facilitate handling, drainage and to facilitate connection of abutting blocks.

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-39 have been considered but are moot in view of the new ground(s) of rejection.
